## Company Outline

Otsubo Seafood Co.,Ltd. is one of the manufacturers for processing frozen and chilled seafood for years ,such as bluefin tuna, bigeye tuna, yellowfin tuna, skipjack tuna and also salmon . All products are produced by sliced, cutted, minced and mixed with salmon & squid. We not only have our own two factories but also have many cooperated factories which are located in Japan. All products are manufactured under the certificate by USFDA HACCP for food to delivered to tables safe and secure, since 2003. To ensure our products are very the best, they are produced with the most advanced equipment and the strictest quality control procedures.

## Super Frozen Tuna

**Quality meets convenience.** Our HACCP certified premium tuna has never been gassed with carbon monoxide. Instead, they are been super frozen to -67° F (-55°C) below zero to maintain its freshness straight out of the ocean. Many top chefs prefer super frozen tuna as its quality can stand up to their high standards. Plus, our products are cut and packaged in a variety of shapes and sizes for a hassle-free preparation. Sushi, sashimi, rolls, tartare—Whatever the occasion, our premium tuna from Japan is always fresh and ready to use.

## Competitive Advantages

- Certified by USFDA HACCP since February 2003. For hygienic control system, HACCP methods are in order to remove or reduce any potential hazards like food poisoning bacteria, contamination and foreign matter contamination. In all processes from raw materials to shipment of products, we manage this most important of process. This method of hygiene management guarantees the safety of our products.
- Super frozen tuna (-55°C/-67° F)
- 900 Various Products ( products line-up below )
- Products are able to be packed by vacuum pack when exporting.
- New main factory has been completed in May 2019.
